# DMYTRO MYRONOV

**Senior Software Engineer · PHP (Magento 2, Laravel) · Python / Django · AI Automation**

Wrocław, Poland · Remote / on-site · open to any time zone

+48 506 843 394 · dmytro.mironov@gmail.com · linkedin.com/in/dmytro-myronov-3054397a

## Summary

Senior software engineer and **Backend Lead** with **12 years of commercial PHP** and a broad backend profile. My deepest expertise is **e-commerce on Magento 2 / Adobe Commerce (8+ years)**: today I lead the backend of a four-brand B2B/B2C platform with ERP integrations (Kerridge, NetSuite), performance work and CI/CD. Beyond Magento I build **Laravel platforms** (carbon accounting for logistics, legal document workflow, a two-sided marketplace with Stripe Connect), **Python / Django** back ends and **computer vision** (YOLO + OpenCV vehicle detection, PyTorch). **AI automation is how I work every day**: I built **MagePilot**, my own multi-agent system on the **Claude Agent SDK** that takes Jira tickets to a tested branch with investigation, design, code and browser QA, guardrails and human review. Strong in integrations of any kind: ERP, CRM, payments (NMI gateway built from scratch, Stripe, HeidelPay), queues, retries and idempotency. English — B2, daily working language.

## Core Competencies

- **Backend architecture** — REST / SOAP / GraphQL APIs, queues and cron, domain modelling, code review standards, technical leadership
- **E-commerce & Magento 2** — custom modules, checkout and payments, B2B pricing, Hyvä, upgrades, large catalogs (250,000+ records)
- **Laravel & Python** — Laravel services with queues and OpenAPI; Django / DRF back ends, Celery, Pandas data pipelines
- **Integrations & data sync** — ERP / CRM / payment providers, two-way sync, retries, idempotency, reconciliation
- **AI automation** — multi-agent pipelines, Claude Code agents, skills, hooks and MCP servers, n8n workflows with LLMs
- **Computer vision** — object detection on video, model fine-tuning and evaluation, inference as a Python service

## Technical Skills

**Languages:** PHP 8.x (5.6–8.3), Python 3, SQL, JavaScript (ES6+), TypeScript, Node.js, Bash

**PHP:** Magento 2 / Adobe Commerce (2.3–2.4.8), Adobe Commerce Cloud, Magento 1, Laravel (Queues, Scheduler, Filament, Livewire), Yii / Yii2, Hyvä, Knockout.js

**Python:** Django, Django REST Framework, Celery, Pandas, NumPy, pytest, FastAPI, asyncio

**AI & Automation:** Claude Agent SDK, Claude Code (custom agents, subagents, skills, hooks, MCP servers), Playwright MCP, OpenAI / Anthropic APIs with tool calling, n8n, LangChain, Ollama

**Computer Vision & ML:** OpenCV, YOLO (Ultralytics), PyTorch, dataset annotation, super-resolution model training

**APIs & Integrations:** REST, SOAP, GraphQL, OpenAPI, OAuth 2.0, JWT, webhooks · NetSuite, Kerridge, Salesforce, Mindbox, QuickBooks Online · Stripe / Stripe Connect, NMI, HeidelPay · Algolia, Elasticsearch

**Databases & Queues:** MySQL / MariaDB, PostgreSQL, MongoDB, Redis, Varnish, Elasticsearch / OpenSearch, RabbitMQ

**DevOps & Quality:** Docker, Docker Compose, GitHub Actions, GitLab CI, Jenkins, Nginx, Linux, AWS, zero-downtime deployment · PHPUnit, Codeception, pytest, Playwright, PSR-12

## Own Projects

**MagePilot — AI multi-agent system that automates development tickets (own project, 2026)**

Python 3.12 · Claude Agent SDK · Claude Code · MCP · Playwright · asyncio · SQLite · FastAPI · Telegram Bot API · Docker

- Daemon that pulls my sprint tickets from **Jira** and runs each one through specialised **AI agents**: an investigator turns the ticket into a concrete task, an architect drafts a design (approved by me in Telegram), a coder implements it on a new branch, and a **QA agent** verifies it with tests and a real browser through **Playwright MCP**
- Agents work inside local **Docker** stacks of the real project; a second project can run **in parallel on shifted ports** (my own tool)
- **Guardrails first**: a hook blocks force-push, pushes to master, history rewrites, credential reads and Docker control; I review each branch and open the pull request myself
- Also an **estimator agent**, a voice / text question channel for agents (faster-whisper), a live kanban web UI and ~140 pytest tests; **used daily on real client tickets**

**Easy Ride — parking-lot vehicle detection**

Python · OpenCV · YOLO · PyTorch · Django · MySQL · REST API

- Detected and counted **vehicles on parking-lot camera video** with **YOLO + OpenCV**: per-spot regions of interest, **free / occupied status** in near real time; detector fine-tuned on own annotated frames (angles, night light, occlusion)
- Built the **Django** backend and web app around it: user flows, payments and a currency-rate API
- Related: a **PyTorch super-resolution network** for image upscaling, evaluated with PSNR / SSIM

## Professional Experience

### Hoofdfabriek — Netherlands (remote) — Nov 2023 – Present

**Backend Lead / Tech Lead**

Backend, integration and architecture ownership for a **four-brand Magento 2 platform** (B2B and B2C).

- Own the integration with **Kerridge Wholesale, a legacy ERP**: cron-driven **delta sync** of products, tiered B2B pricing, stock and customers, plus **full catalog imports of up to 250,000 records**

- Built the **NetSuite transactional integration** creating up to **2,000 orders and invoices per day**, with retry, idempotency and reconciliation
- **Magento 2.4.x upgrades**, B2B **Hyvä** storefront with GraphQL, Varnish / Redis / MySQL optimisation
- Own **CI/CD** on GitHub Actions: static analysis, automated tests, zero-downtime deployment
- Introduced **AI-assisted development** to the team: Claude Code agents for analysis, estimates, code, review and tests, and my MagePilot pipeline for Jira tickets
- **Technical Lead on multiple projects**: architecture decisions, code review, release process, onboarding

Stack: PHP 8.2 · Magento 2 / Adobe Commerce · MySQL · Redis · Varnish · Elasticsearch · Docker · GraphQL · REST · Kerridge · NetSuite · Claude Code

### Independent Contract Work — Germany, EU, US — 2020 – 2025

**Backend Engineer (Laravel, Yii2, Django)**

Sole engineering ownership from architecture to production support, in parallel with full-time roles.

- **Carbon accounting for logistics and manufacturing** (Laravel, Laravel Queues, Redis): ERP data ingestion over REST, $CO_2$ calculation per shipment, queued reports, cached dashboards
- **Two-sided marketplace** (Laravel, React, Stripe Connect): listings, reservations, billing and payouts with idempotent webhooks, documented OpenAPI REST API
- **Legal document workflow** (Laravel, PostgreSQL, queues): document generation, versioning, e-signature, audit trail, async PDFs, two-way invoice sync with **QuickBooks Online**
- **Electronic Health Record platform** for ~20 clinics in Germany (Yii2, MySQL, Redis, Elasticsearch): GDPR-compliant role-based access, audit logging, lab integrations
- **Supply-chain analytics** (Django, DRF, Pandas, Celery, RabbitMQ): CSV / Excel ingestion, KPI reports, JWT auth, async notifications

### StartupSoft — Poland — Feb 2023 – Oct 2023

**Senior Software Engineer**

**B-Stock (US)**, B2B liquidation auction marketplace.

- **NetSuite ERP integration** (orders, customers, inventory) on a large legacy Magento codebase
- Auction services in **Node.js**, shipping and payment provider APIs, data-processing automation in **Python**

Stack: PHP · Magento · Node.js · Python · MySQL · REST API · NetSuite

### InTechSoft · IdeaSoft.io · SSA Group — Kharkiv, Ukraine — Apr 2017 – Dec 2022

**Magento Developer / Team Lead**

Magento 1/2 and Adobe Commerce Cloud for clients in the **US, Australia, Germany and the EU**: Coco Republic (AU), Foundrae (US), Beaurepaires · Goodyear (AU), Lora DiCarlo (US), Mindbox · L'Oréal, GlobeWest (AU).

- Built a **multi-card NMI payment gateway from scratch** and led full-cycle delivery, including mentoring; integrated **HeidelPay** and **Stripe**
- **Salesforce CRM** (SOAP and REST), **NetSuite** and **Mindbox (L'Oréal)** integrations: orders, customers, products, transactions
- **REST APIs with OAuth 2.0** for a mobile client; quote-and-pricing engine, custom product types
- Performance on large catalogs: **Elasticsearch** and **Algolia** search, MySQL optimisation; **Magento 1 → 2 migration**, **Codeception** tests

Stack: Magento 2 / Adobe Commerce Cloud · Magento 1 · PHP 7.x · MySQL · Elasticsearch · Algolia · REST · SOAP · OAuth 2.0

### SEOBOOST — Kharkiv, Ukraine — 2013 – Feb 2017

**Team Lead · Web department**

- Led the web team: task allocation, solution design, client consulting; e-commerce on **Yii and AngularJS**, OpenCart and WordPress; Nova Poshta shipping integration and data-migration tooling

## Education, Courses & Languages

**MSc / BSc, Computer Networks and Telecommunications** — Kharkiv National University of Radioelectronics (2013), Kharkiv College of ICT (2012)

**Courses:** Python Pro (Hillel, 2024) · Computer Vision (Robot Dreams, 2023) · DevOps (Hillel, 2020) · Magento Developer (Spalah, 2016)

**Languages:** English — B2 (Upper-Intermediate), daily working language · Ukrainian, Russian — native · Polish — A2
